

# AUTOMATED TROLLEY SYSTEM

The Safe Foods Chemical Innovations Automated Trolley System is a PLC controlled system to upgrade the entire trolley cleaning and lubing process.

## ELIMINATES

- > Operators wiping trolleys
- > Yield loss due to trolley oil contamination
- > Excessive utility costs\*

## AUTOMATED CONTROL AND MONITORING

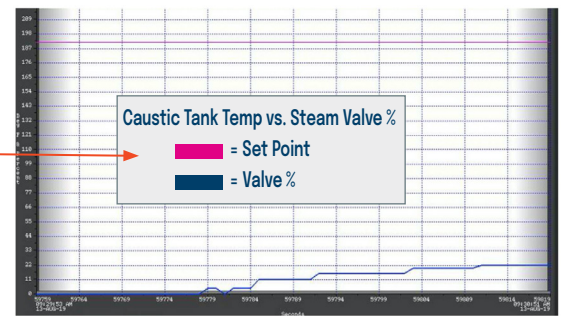

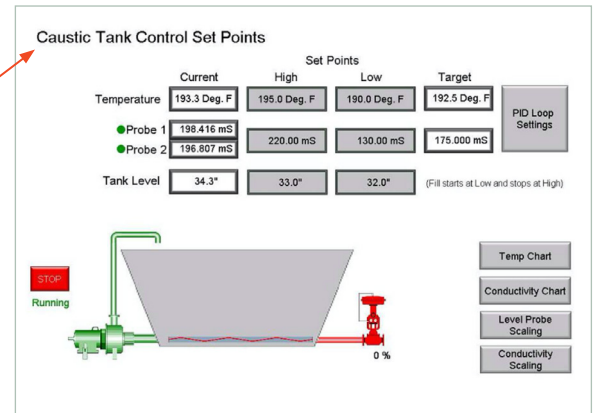

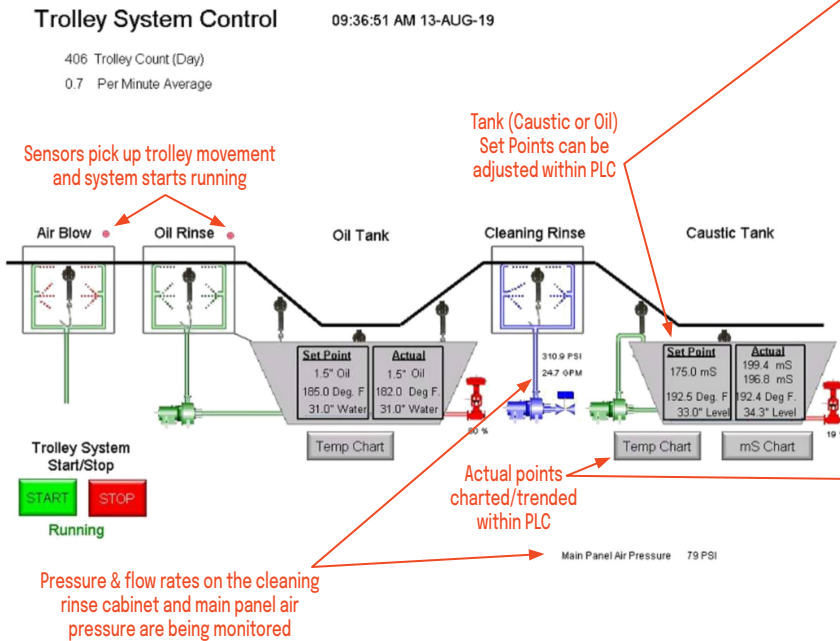

- > Temperature
- > Chemical concentration
- > Water and oil levels
- > Water flow and usage

## ONE TOUCH SYSTEM STARTING AND STOPPING

- > Alarm capacity to notify key personnel if issue
- > Cellular router built in for remote troubleshooting

\*Reduces utility consumption as only rinses and air blows when trolleys are present
